Pacon Corporation

Materials Needed:

- [Colored Wood Craft Sticks](#)
- Glue
- Pictures

Instructions:

1. Create the Frame: Choose 8 colored craft sticks, 6 of one color and 2 of another. Lay 2 of the same colored craft sticks horizontally for the top and 2 more horizontally for the bottom. Glue 2 of the remaining colored craft sticks vertically to each side to complete the frame.

2. Make it Stand: Carefully turn the frame over and attach your picture to the back. Then take another 10 colored craft sticks and glue them together in a stack. Glue the flat side of this stack to the bottom of the frame (This is what will support the frame when standing). Glue 4 additional craft sticks to the back of the frame to support your picture. Let dry.
